

the radio station Airl has served my community for many years, and not only my community but that of my entire family. We listen to Airl as an uplifting spirit filled alternative to all other stations. I know many people myself included who would have not even began listening to the radio without Airl. As a Christian it is very important to me that Airl remains on the air. Cost effectiveness should never replace content. If Airl is removed from the air waves there will be a decline in the society that Airl ministers to. Violence, drugs, and sex will be forced on our community in an even greater way than it already is. By giving preference to other radio stations the area(southern CA) Airl supports will lose a vital resource. Airl provides public service by playing music that promotes peace, love, community, etc. The music Airl provides encourages the community to be Law Abiding and self-controlled. Everything that Airl provides is in the interest of the public, whereas music provided by certain other stations (KROCK, KISS, KGGI, etc.) is not because it promotes prostitution, drugs, murder, theft, gangs, the list continues. Please do not provide preference to stations that are using a low energy fm wave simply for the sake of being cost effective. If it will save that much then provide an upgrade service for every station free of charge.
